CHRIS-MARINE® - the optimum solution

Solid Experience and International Network

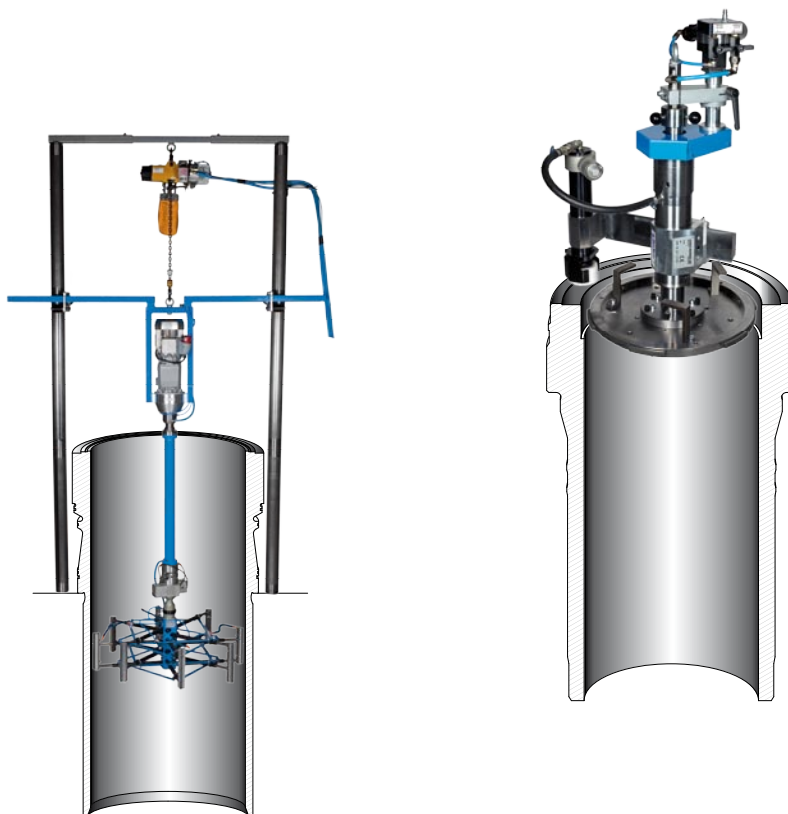

For almost 50 years the Swedish family-owned Chris-Marine® has been the major international specialist in designing, developing and manufacturing high quality maintenance machines and methods for diesel engines.

Our company is constantly growing and has sales offices in Singapore, China, India, Russia and Greece. In Singapore there is also a well-equipped workshop, and in Denmark the recent acquisitive subsidiary IOP Marine, a market leader in fuel injector test equipment.

A close cooperation with local agents also helps us to serve our customers independent of their location.

Well Educated and Dedicated Staff

130 well educated men and women worldwide are working to improve our products and services. They are constantly increasing the quality that has been the hallmark of Chris-Marine's machines and services since the enterprise began in 1962.

A Growing Product Range

In parallel with the increasing market shares, the product range is growing to meet the conscious customers' constant demands for more advanced machines and tools for an ever-wider range of applications such as:

- Surface grinding machines
- Portable lathes
- Piston ring groove grinding machines
- Valve and valve seat grinding machines

All machines are designed, developed and manufactured in our main office and workshop in Malmö, Sweden. They are built on experience gained during almost half a century and in cooperation with major engine makers and quality-conscious users a shore and at sea.

Unlimited Worldwide Service

The international diesel engine service is performed by engineers with solid experience and knowledge in diesel engine repair and maintenance. The service is available in ship's engine rooms, at power stations as well as for reconditioning of used and damaged engine parts in our own workshops in Sweden and abroad.

Among the specific service assistance are noted:

- Honing of cylinder liners
- Grinding of gas and water sealing surfaces
- Milling of O-ring grooves
- Machining on engine frame
- Installation of the HJL SIP-System

(Chris-Marine® has gained certification for installing the HJL SIP-System).

Added Knowledge through Acquisition

With the newly incorporated IOP-Marine, a unique knowledge in fuel injector tests, highly recognized hydraulic power units and fuel injector test equipment are added to our well-known products.

Training and Information

Additional and very appreciated services also provided worldwide by Chris-Marine®, are problem solving, operator training and information on maintenance methods for valves, seats, cylinder liners, sealing surfaces of liners and related issues. We know your needs and we serve you all the way.
