

DEGLAZING MACHINE TYPE DGL-SE

SI-144-E-DGL-SE

**Important possible service instruction for delivered machines
with electric motor by the manufacturer Lenze**

If any of the below machines have a motor manufactured by Bonfiglioli this instruction does not apply.

FOR WV32, WV34SG, W32, W34SG SERIES

Pertains to the following machines only;

Serial numbers: 2250, 2251, 2253, 2255 – 2258, 2752 – 2761, 2846 and 2847

FOR W46, 46F, 50DF SERIES

Pertains to the following machines only;

Serial numbers: 2291, 2292, 2293, 2883, 3016, 3017, 3020** and 3024**

**Machines 3020 and 3024 to be returned to Chris-Marine AB for service.

Due to an altered motor flange there is a need for a spacer on the outgoing motor/gearbox shaft.
These steps are essential to carry out before starting a DGL equipped with the electrical motor by the manufacturer Lenze.
The machine will be damaged if no action is taken.
